

How to Download & Run Cisco AnyConnect (VPN)

1. Go to: 

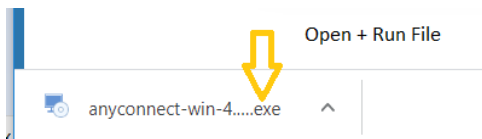

2. Download the file:

Download & Install

Download Cisco AnyConnect Secure Mobility Client and install it on your computer.

Download for Windows

3. Next, double click on the file and run it (if it does not automatically run for you):

Open File - Security Warning

Do you want to run this file?

Name: [...onnect-win-4.8.03043-core-vpn-webdeploy-k9.exe](#)

Publisher: [Cisco Systems, Inc.](#)

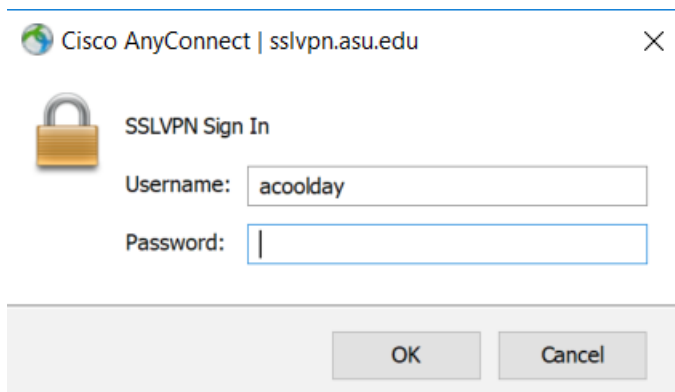

Type: Application

From: C:\Users\acoolday.ASURITE\Downloads\anyconne...

Run

Cancel

4. You will be asked to enter your ASU login credentials, which will be the same username and password you would use for My ASU.

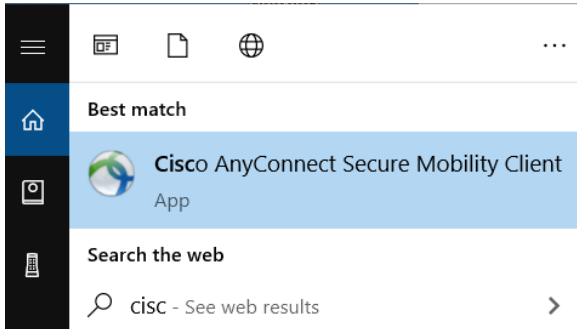

5. Once downloaded, the Cisco AnyConnect program will be on your computer.

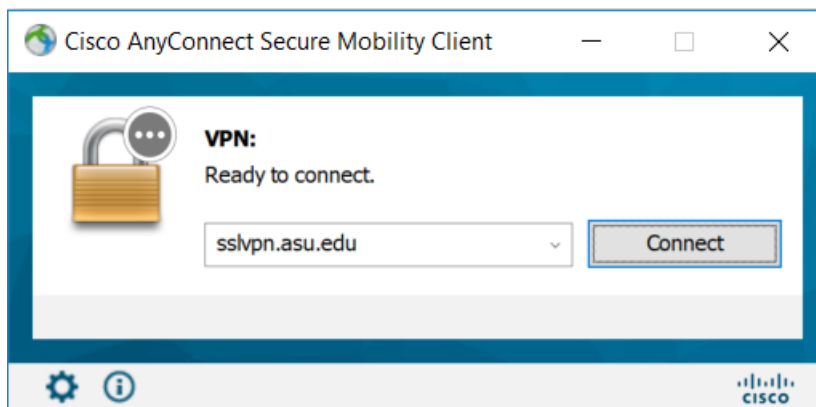

Next, you will want to have it running, as it will not be running unless you open the program.

Apple users can go to 'Applications' and double click on "Cisco Any Connect" to run the program.

Windows users can search for it via the search bar on the bottom menu bar.

6. Enter in sslvpn.asu.edu into the text field and hit 'connect' (it may once again ask you to sign-in using your ASU credentials):

VPN is now running!
